

Your advantages

- State of the art, innovative, alternative fuel systems.
- Reduce your fuel cost.
- Contribute to an environment by larger CO₂ reduction.
- Excellent driveability, as the engine management is fully controlled by the original engine computer (ECU).
- Starts on autogas and reduce fuel and cost.
- Maintenance free completely during lifetime
- Not sensitive for external factors such as ambient temperature, humidity or altitude.
- System Warranty of 5 years with a maximum of 250.000 km.
- Complies with R67 and R110 regulations.

Apply to a Vialle Dual-Fuel System and reduce your operating costs significantly

- Significant reduction of your operating costs.

Dual-Fuel Systems

Diesel - **LPG** blend
Diesel - **CNG** blend
Diesel - **LNG** blend

Alternative Fuel Systems for medium & heavy duty applications

- Vialle proudly offers the most advanced alternative fuel systems worldwide available to you: its unique and highly innovative Dual-Fuel Systems. The Dual-Fuel Systems are specifically developed for medium and Heavy Duty vehicles.
- The system is based on sequential vapor injection of LPG in the intake manifold. Depending on the fuel consumption [mg] and RPM and CAM shaft signals the correct blend rate is calculated by the Vialle ECU.
- No adaption in Diesel software required.
- Quick and smart system installation of wiring harness (all connectors) supplementary to the original engine
- Easy hardware installation
- Fuel blending mixture computed by CAN data.
- OEM quality components and R67 / R110 certified
- Reduce fuel costs significantly 10+% approximately, and reduce NOX, CO2 and particles.
- Mono Fuel systems available, based on similar technology.

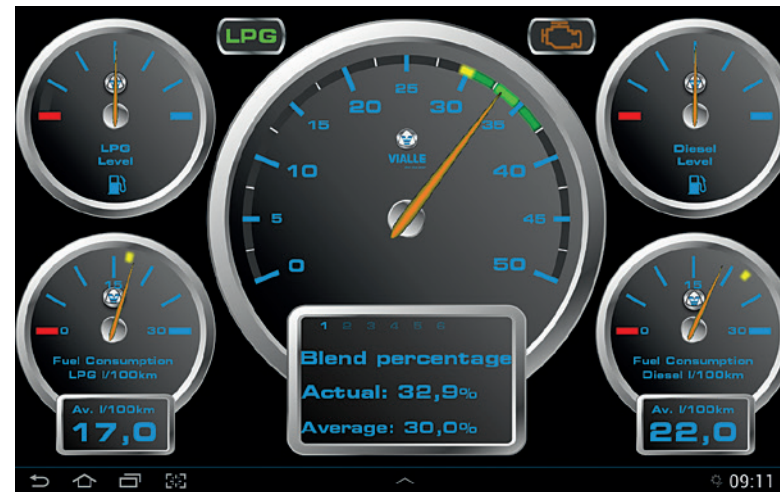

Saving potentials based on mileage					
	(km)	100.000	125.000	150.000	250.000
Savings	€/100km	5,22	5,22	5,22	5,22
