DRIVING PERFORMANCE FOR HALF THE FUEL COSTS

LIQUID LPG TECHNOLOGY

LiquidSi is an unique and innovative LPG system that injects LPG in liquid phase in the engine.

This results in a higher performance and greater driveability than conventional LPG systems.

LiquidSi works well in extreme conditions, as its performance is not influenced by high or low temperatures, the autogas mix or humidity.

LiquidSi is maintenance free. LiquidSi can be installed on all modern multipoint petrol engines, including turbo charged engines, lean burn engines and Euro5 engines.

This results in an ultimate reliable system, giving you lots of driving pleasure and fuel costs savings for a long time.

LiquidSi is available for a very competitive price.

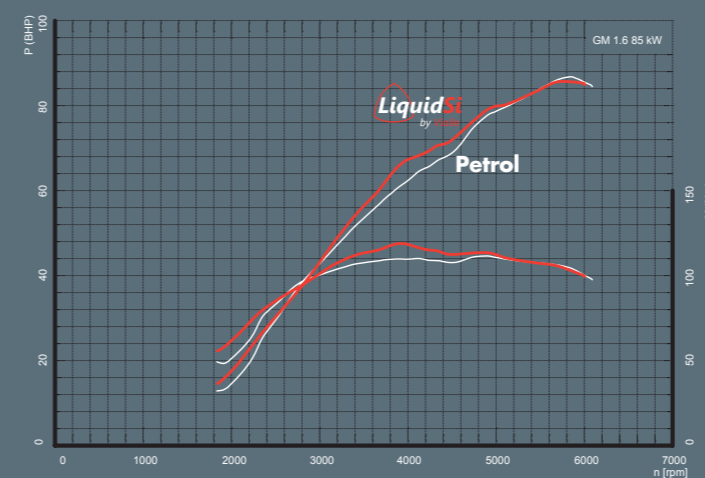

RANGE (KM) WITH € 50,-

Range calculated with avg fuel prices dated November 2015

Petrol	670 km
Autogas	1209 km

GREAT PERFORMANCE

LiquidSi offers the optimal mix of power and fuel consumption

	Petrol	LiquidSi
Peugeot 107 Project CO ₂ -100minus		
CO ₂ (gr/km)	109	91
Power (kW)	68	70

Fuel cost of a full tank	Petrol	Autogas
	€ 65,-	€ 30,-

Price based on average Dutch prices dated November 2015 with a tank capacity of 40 liters.

EASY TO INSTALL NO MAINTENANCE
